<input type="text"/>	Enterprise Edition - Unlimited users, 10 PCs or Network stations.	US\$4995.00	<input type="text"/>

***Note for above educational software**

* The **Professional Edition** provides evaluation and feedback for each fault attempt. It is suitable for situations where developing troubleshooting skills and providing practice is more important than the documentation of results. Users have access to the complete fault set, and can print out a progress report as well as a certificate of completion.

* The **Enterprise Edition** includes all the features of the Professional Edition plus instructor resources and a more detailed evaluation system. Documentation of results, individual and group reporting, and certificates for successful completion make this edition suitable for use in formal training programs.

* Only the **Enterprise Edition** is available as **Concurrent Workstations on Network** which allows the program to be installed on a server and allows the program to be accessed by any computer on the network. It is however limited by the number of computers that can access it at any one time, based on the number of Concurrent Workstation licenses purchased above.

* All of the above are currently available as downloads only. The **Instructor Resources** and **instructor guide** for **Enterprise Edition** program are also offered as a download only. Instructor resources include **solutions** to the faults, tips on using the troubleshooting program as a course, [course management software](#) to

PLC Training Software Simulator and other Maintenance Training Programs

Quantity

<input type="text"/>	PLCTrainer CBT Bundle w/ LogixPro Client Server - 10 Workstations, unlimited users	US\$999.00	<input type="text"/>
